Telecommunications

We can supply, install, commission and maintain any of the following:

- Phone Systems complete
- Extra Telephone points
- Intercom Systems
- Nurse/Call Systems
- Public Address Systems

All designed for the small to medium sized businesses.

We also service and repair all of the above.

Access Systems

We can supply and install all of the following types of entry/access equipment including:

- Door Digital Keypads
- Electric Gates
- Door Entry Systems
- Automatic Barrier
- Intercom Systems
- Swing/Sliding Gate Automation

Electrical

Telesat Communications Ltd are Napit approved, Part P registered Electrical Engineers.

We cover all aspects of electrical works from simply changing a light fitting to complete full domestic and commercial installations.

We can do periodic inspections for Landlords, Schools and Offices etc.

CCTV

Closed Circuit TV is used widely in the home and workplace to see/record many areas at any given time.

Our camera's are capable of recording in extremely low light levels and can be used in various applications including license premises, domestic households and business premises meeting all the requirements of local authorities including Police, Councils etc.

You can use a CCTV System in a small domestic household just to see who is at the door or in a large commercial environment with several camera's recording indefinitely onto a hardrive, as CCTV is so versatile.

The Digital Video Recorders can be networked over the internet enabling access to images from anywhere anytime.

We offer a completely free of charge and no obligation site survey and quotation to survey your premises for your own particular needs and budget.

Intruder Alarm Systems

We have been providing and installing Intruder Alarm Systems for more than 20 years, with literally 100's of systems installed throughout the county.

We can protect both domestic and commercial premises using a variety of equipment including passive infrared sensor's, seismic shock sensor's, magnetic contacts etc.

Speech diallers can be installed on all our systems enabling the system to contact any mobile or landline number in an 'Alarmed Condition'.

Our sounders/strobes are all screen printed with our name and telephone number.

It is a proven fact that just having an Intruder Alarm System installed deters a 'would be burglar' as he prefers a 'non protected property'.

Every 23 seconds someone in this country is burgled, having protection could stop this being you.
